Generierung des Eingangssingals für Barrier Bucket RF Systeme and der GSI

TECHNISCHE UNIVERSITÄT DARMSTADT

Jonas Christ, Artem Moskalew, Maximilian Nolte
Jens Harzheim, M.Sc.

Projektseminar Beschleunigertechnik

Outline

1. Einführung
   - Problemstellung
   - Zielsetzung
   - Gegeben
2. Erreichtes
   - Gerätekommunikation
   - Code
3. Evaluierung
   - Gerätekommunikation
   - Code
4. Ausblick

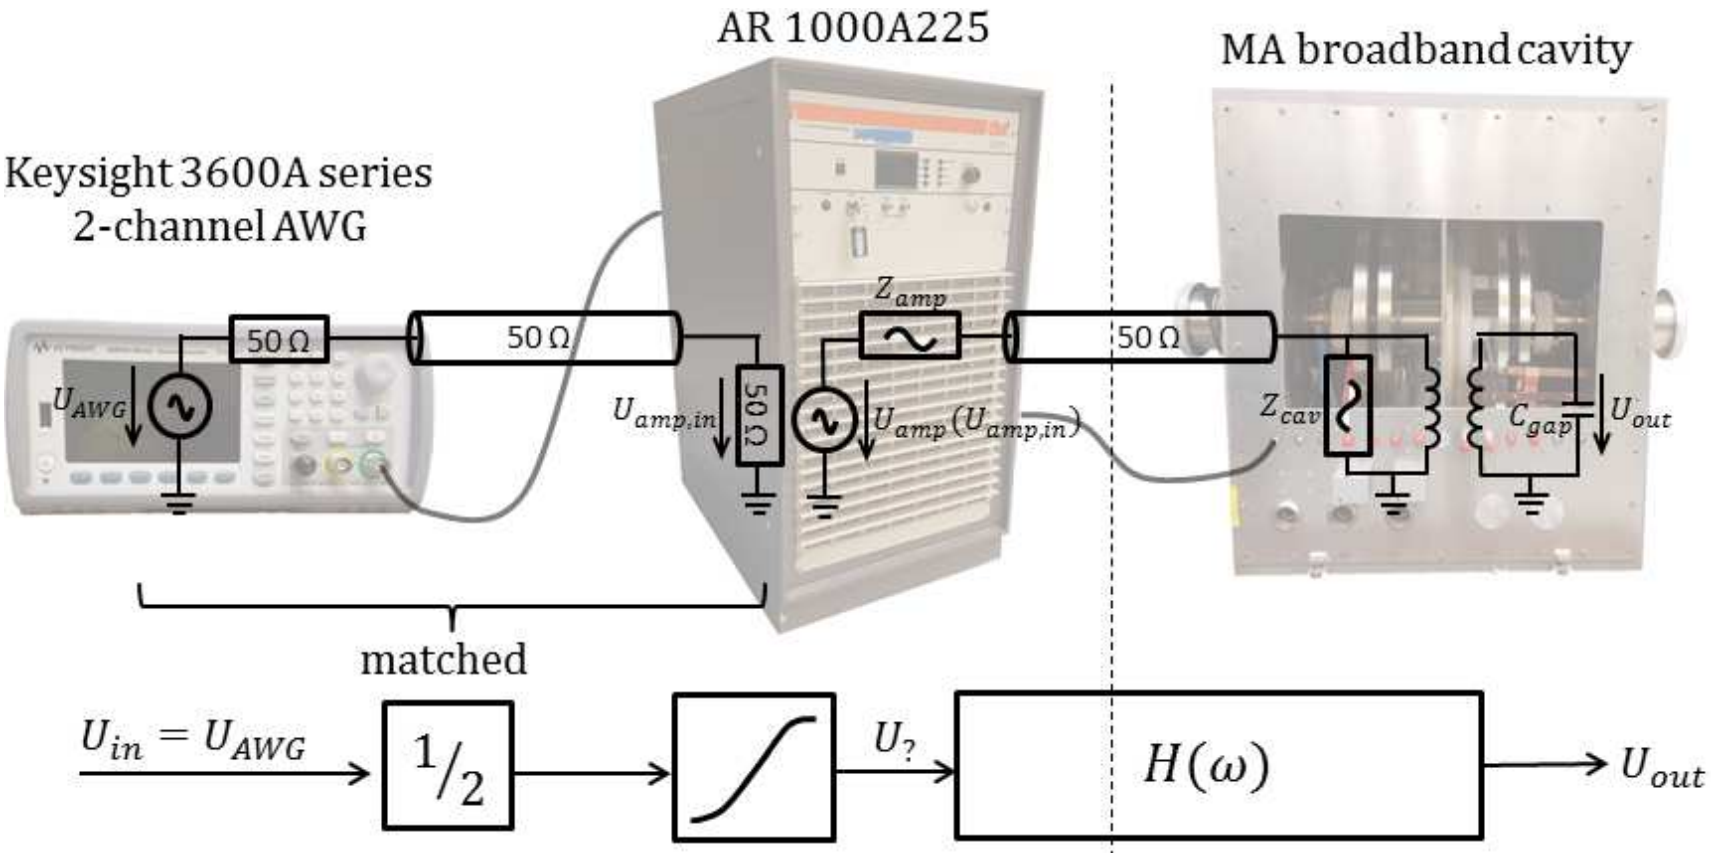
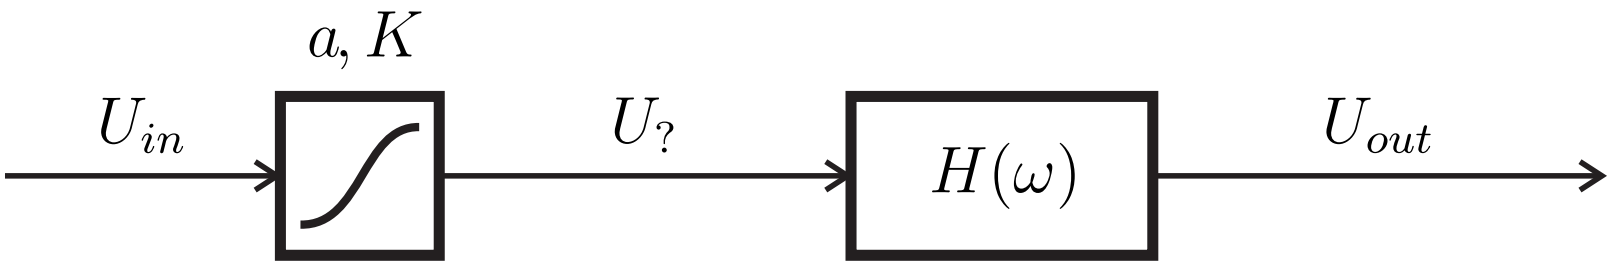
Erreichtes: das VISA-Handbuch

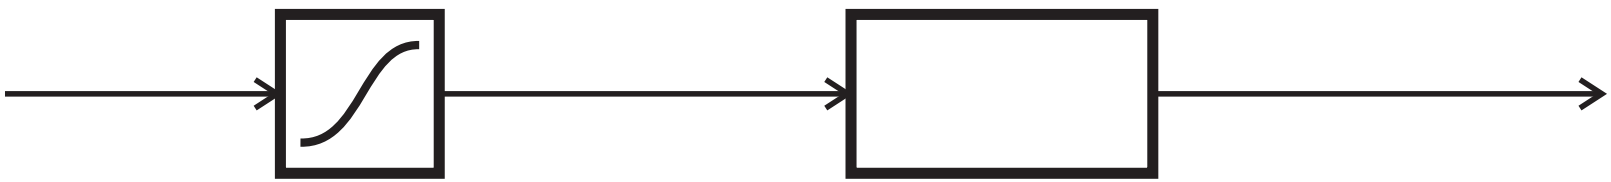
Erreichtes: Code



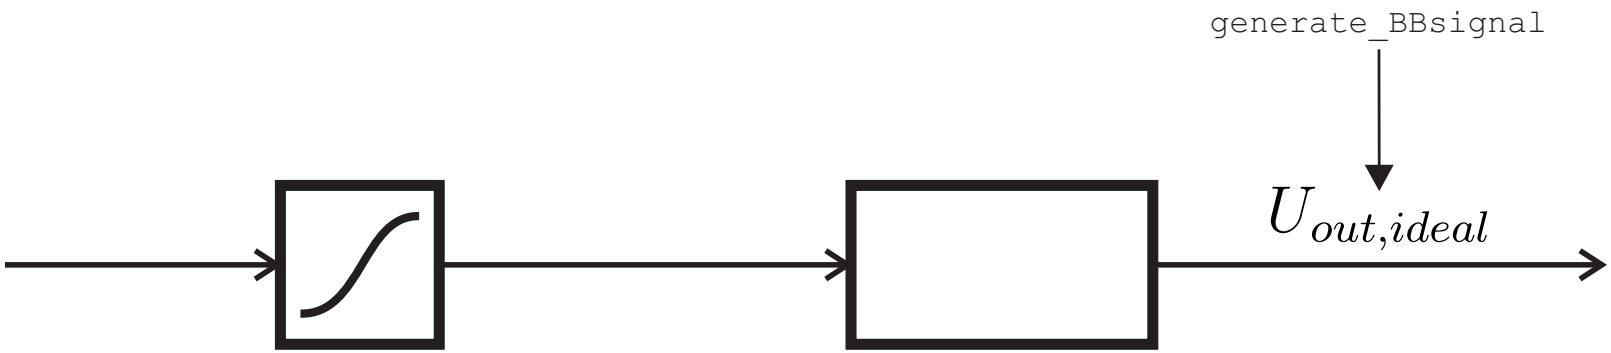
Erreichtes: Code



Erreichtes: Code

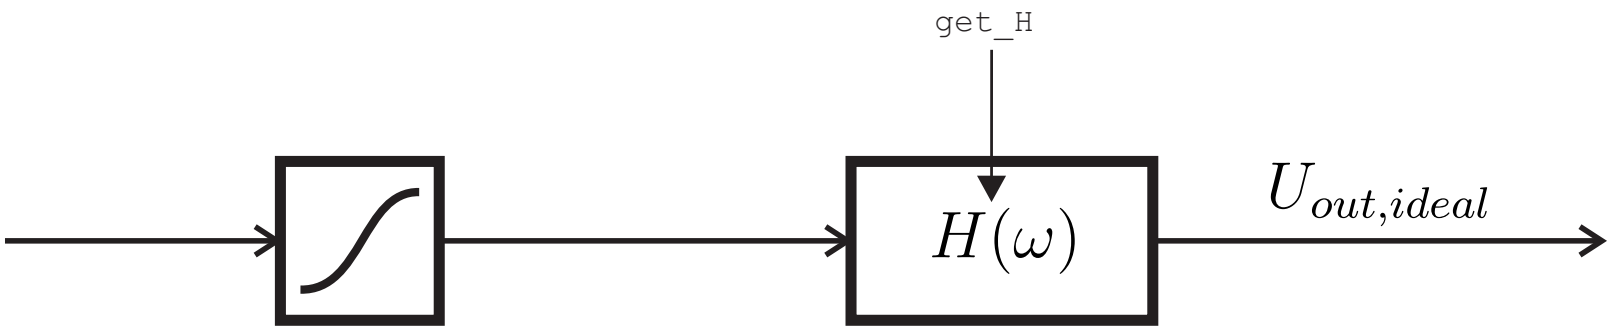


Erreichtes: Code



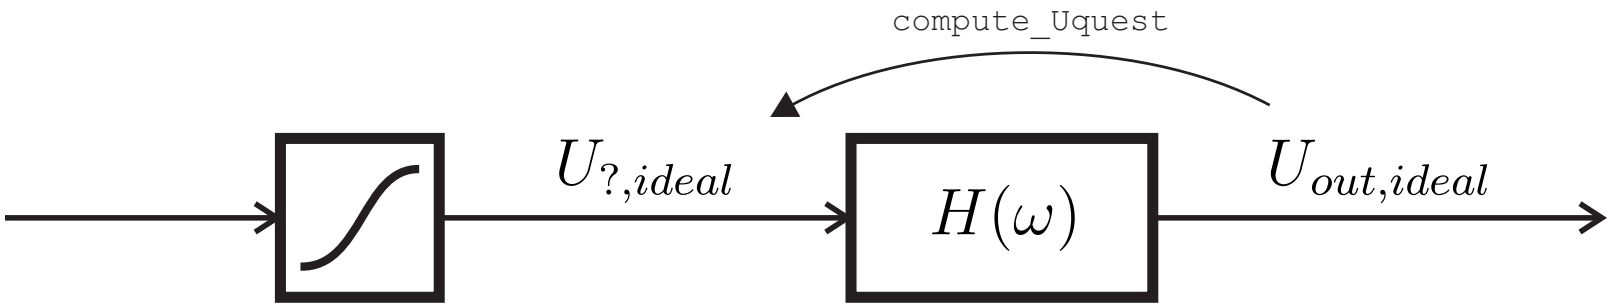
```
1 Uout_ideal = generate_BBsignal ( fq_rep , fq_bb , vpp )
```

Erreichtes: Code



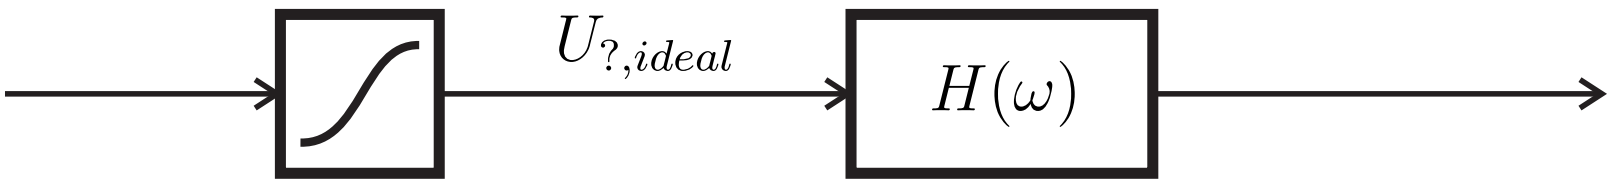
```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
```

Erreichtes: Code



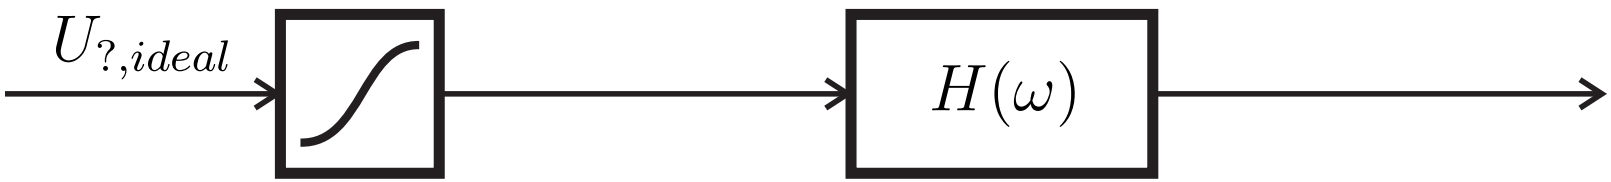
```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
```

Erreichtes: Code



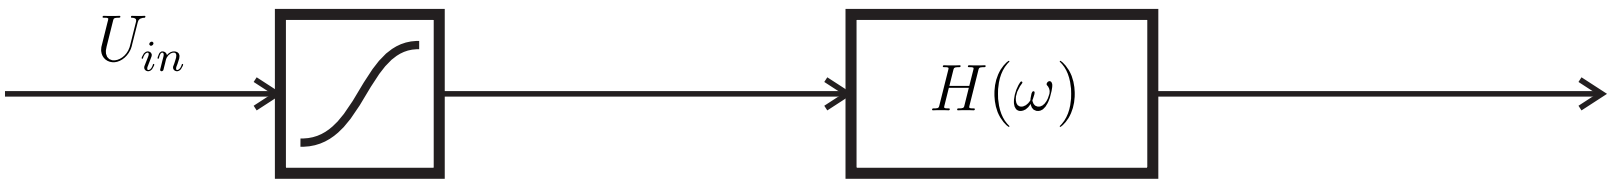
```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
```

Erreichtes: Code



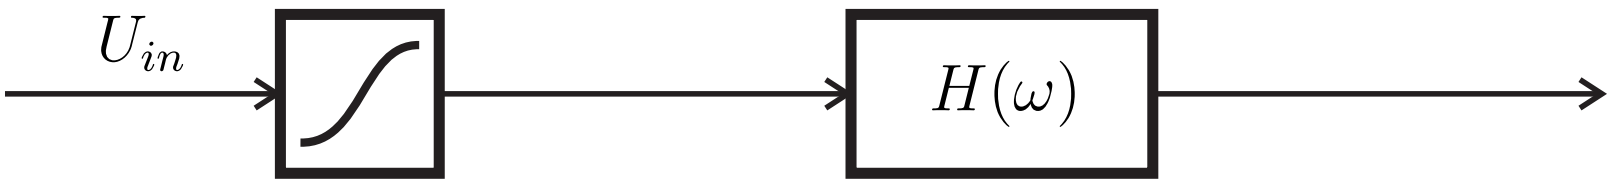
```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
```

Erreichtes: Code



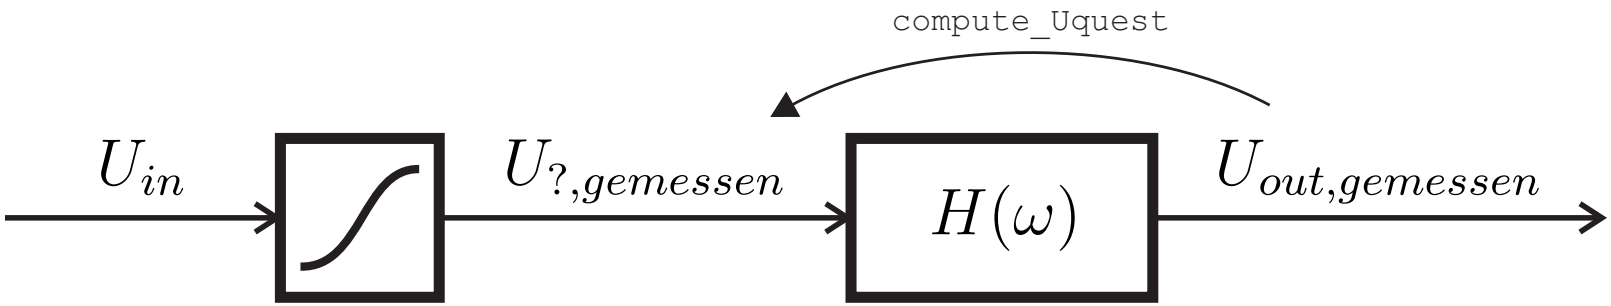
```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
4 Uin = Uquest_ideal
```

Erreichtes: Code



```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
4 Uin = Uquest_ideal
5 Uout_measured = measure_Uout ( Uin )
```

Erreichtes: Code



```
1 Uout_ideal = generate_BBsignal ( fq_rep, fq_bb, vpp )
2 H = measure_H ( )
3 Uquest_ideal = compute_Uquest ( Uout_ideal, H )
4 Uin = Uquest_ideal
5 Uout_measured = measure_Uout ( Uin )
